Project
EECS 314, Computer Architecture, Spring 2011

Deliverables:

Project has two deliverables: 1) the code (email) and 2) the report (hard-copy).

Both are due by **5:00pm, Monday, May 2**. Please turn in the report (hard-copy) in **TA Anandaroop Ghosh's office**.

1.Code:
Please email the code to TA Anandaroop Ghosh (axg468@case.edu).

One email per group.

The codes should be modular and should have some comments for the key components to make the code readable.

2.Report:

One report per group. The report should be written in single-spaced, 10-point font.

- ➢ If you are giving a demo, your report should be about 2 pages. **(Type A)**

- ➢ For other groups, the report should be about 4 pages. **(Type B)**

For both Type A and Type B, the report will comprise of the following.

- Problem statement (1 paragraph)
- Major challenges (about 2 paragraphs)
- The key components you have realized (3-4 paragraphs. Describe how you have addressed the major design challenges for each component)
- Integration of different components (1 paragraph)
- The user interface (1 paragraph. Describe the input/output behavior of the program. This will help the instructor and the TAs to run and test your program.)

For Type B, you need to add about two more pages on several sample runs along with brief explanations of the outputs.
